

Awel Abubekar

Software Engineer | Backend Specialist | Python, Go, TypeScript & Distributed Systems

Adama, Ethiopia | awel@example.com

SUMMARY

Software Engineer with hands-on experience in Python, Go, TypeScript, and JavaScript, specializing in building scalable microservices and distributed systems. Proven ability to navigate complex codebases, implement robust testing, and utilize Docker for containerized deployments. Passionate about open-source contribution and leveraging AI-driven workflows to identify architectural gaps and optimize system performance.

EXPERIENCE

Backend Developer

Esclate

- Architected and developed a scalable Blog API using Go, implementing Clean Architecture, JWT authentication, and role-based access control.
- Integrated AI-powered content recommendation engines into backend services, demonstrating proficiency in LLM-based workflows.
- Collaborated on the Lissan AI communication assistant, implementing grammar checking and interview simulation features using Google Gemini API.
- Managed data persistence using MongoDB and ensured high-performance API delivery through optimized Go-based service logic.

PROJECTS

Distributed E-commerce Platform

- Engineered a production-ready microservices architecture using Go and Node.js, utilizing gRPC for efficient service-to-service communication.
- Implemented event-driven workflows with RabbitMQ to ensure asynchronous processing of orders, payments, and delivery services.
- Optimized system performance through polyglot persistence, utilizing PostgreSQL, MongoDB, and Redis for caching and session management.
- Containerized the entire multi-service ecosystem using Docker and Docker Compose, ensuring consistent deployment environments.

Full-Stack E-commerce Application

- Developed a robust backend using Django and Django REST Framework, managing complex user authentication and order processing logic.
- Built a responsive frontend with React, Axios, and Material-UI to provide a seamless user experience across devices.
- Implemented secure API endpoints and data management workflows, ensuring reliable communication between the client and PostgreSQL database.
- Designed and maintained an admin dashboard for efficient product and order management, identifying and resolving implementation gaps.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript

Backend: Django, FastAPI, Node.js

Databases: PostgreSQL, MongoDB, Redis

Tools: Docker, Git, RabbitMQ, gRPC, Nginx
